

Azamara Club Cruises Health & Safety Protocols

A team of top medical and scientific experts are guiding our strategy.

Our love of travel is what keeps us looking forward. Our new Healthy Sail advisory panel—11 expert doctors, scientists, and health specialists—is guiding our way to safely cruising the new world.

The Healthy Sail Panel has provided a 60+page report with over 70 detailed best practices which will be used to inform future public health guidance and preventative measures relating to travel on cruise ships. The Panel submitted these recommendations on 9/21/20 to the U.S. CDC. The Panel identified five areas of focus to improve health and safety for guests and crew and reduce the risk of infection and spread of COVID-19 on board cruise ships.

5 Areas of Focus

1

Testing

Screening

Exposure Reduction

2

Sanitation

Ventilation

3

Response

Contingency Planning &
Execution

4

Destination & Excursion
Planning

5

Mitigating Risks for Crew
