

Azamara Club Cruises Health & Safety Protocols

EXPLORE AGAIN, SAIL WELL

Through our global community consciousness and commitment to wellness, we are implementing new standards with our Explore Well at Sea program to ensure a healthy return to exploring from our boutique hotel at sea.

You will embark on a future sailing knowing we've enhanced our health and safety standards through our Explore Well at Sea program. With the help of our team of medical and science experts, you can expect advanced screening protocols, enhanced sanitation measures, and innovative medical services — to name a few. Given the environment, we are continually evaluating these protocols and updating them as public health standards evolve. You can rest assured, you'll have our most updated program well before your sail date.

Whether you are offshore exploring or onboard enjoying our boutique hotel at sea, our commitment to community consciousness and personal wellness will deliver the peace of mind and safety you need when it comes to traveling within our new world.

We're continually monitoring public health guidelines and will update policies as new information becomes available and standards evolve. Booked guests will be advised of the latest requirements before their voyage.

Testing & Screening

You can board with confidence, knowing we've enhanced our health and safety standards through our Explore Well at Sea program. All guests will be required to be fully vaccinated two weeks prior to sailing, in addition to providing a negative SARS-CoV-2 test result. Once aboard, complimentary COVID-19 testing and medical evaluations will be available as part of our commitment to Explore Well at Sea.

- COVID-19 vaccination required for all guests and crew
- Testing for all crew and guests
- Boarding day screening
- Symptoms reporting
- Medical evaluation

Cleaning Protocols

Building upon our already high standards, Azamara is following advanced cleaning protocols and guidelines recommended by the Healthy Sail Panel of global experts and approved by the CDC. These new measures help ensure the health and wellness of our guests and also provide peace of mind in knowing that every nook of our boutique ships, from bow to stern, is regularly cleaned and sanitized to provide a clean, safe journey. New standards include enhanced team member training, use of EPA-certified disinfectants, and techniques like electrostatic spraying. Best of all, everything you love about Azamara can still be found and enjoyed on board, too, including our world-class service, the warm and friendly service of our crew, and distinctive dining.

- Medical-grade cleaning standards
- Sanitization & prevention control
- Enhanced crew training

Azamara Club Cruises Health & Safety Protocols

Fresh Air Filtration

With new HVAC filtration systems, the air you breathe indoors aboard each of our boutique-style ships is comparable to the fresh sea air you breathe while relaxing on deck. This advanced filtration system takes in fresh sea air and moves it through a 2-stage filter, plus copper coils, to eliminate 99.99% of germs. We have also committed to changing the filters at twice the frequency recommended by the manufacturer for added quality protection.

- 100% fresh, filtered air in staterooms & public areas
- Layered, fine-particle filtration
- HVAC in guest & crew rooms, public spaces & medical spaces

Medical Capabilities

Your health and safety are our priorities. That's why you'll find an enhanced medical facility on board each Azamara vessel, with more equipment and a dedicated infectious control officer. Should there be a COVID-19 case onboard, we have new isolation staterooms to provide comfortable, complimentary care and new agreements in place with local governments, hospitals and transportation partners to ensure a safe return home.

- Medical center enhanced with staff and equipment
- Onboard testing capabilities
- Multi-level response plan
- Dedicated infectious control officer on every ship
- Telehealth support
- Commitment to safe and timely return home
